Tech Lead / Senior Software Engineer

Profile

I am a team leader and software engineer with a 15 years track record in delivery and innovation across several tech companies, nonprofits, and startups. I help organisations to apply new ranges of technologies to solve challenging real-world problems with a strong entrepreneurial focus, and ultimately to build and launch successful products that customers love.

I act as a bridge between the engineering team and the rest of the business, with a strong hands-on technical element (to stay relevant to the engineering effort) and management responsibility (to have the authority to get stuff done). I like to lead software development and delivery on technically interesting projects.

Work experience

Senior/Lead Full Stack Engineer (contract based positions)

Writing code and delivering new features. Managed code reviews across all teams. Agile (SCRUM) delivery.

→ **Progressive Content**, London, United Kingdom – Since Sept. 2020 (progressivecontent.com)
